Flat Ladder Rack

Model Numbers: AULR-FR-108, 120, 132

from our Aerial Lift & Utility Body Ladder Rack Series

Flat out good...

Quik-Facts

A. Built from Rust Free Aluminum

Built completely out of Aluminum.
Guaranteeing long life & no rust.

B. Includes our Patented Ladder Restraint System

Helps secure the ladder from theft and shifting during vehicle operation.

C. Slide Rails for guidance

These parallel rails are designed for easily sliding the ladder up the racks

D. Rear Roller Assembly helps loading and unloading

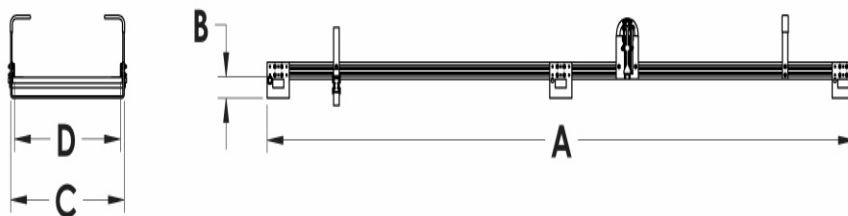

Takes the work out of loading and unloading, the rollers do all the work for you.

E. Easy Assembly & Installation

Assembles in minutes using hand tools. The installation is easy requiring only a few bolts into the top of the service body.

Using our patent pending ladder rack design, our engineers have created another perfect fit. Created specifically for the Utilities industry, this rack fits virtually any service/utility body with a 20" wide compartment. The **Flat Ladder Rack** comes standard with our patented **Side Mount Ladder Restraint System**. This rack works great with our secondary racks for storing multiple ladders.
