Inclined Ladder Rack

Model Numbers: AULR-IR-108, 120, 132

from our Aerial Lift & Utility Body Ladder Rack Series

Up, Up & Away

Quik-Facts

A. Built from Rust Free Aluminum

Built completely out of Aluminum.
Guaranteeing long life & no rust.

B. Includes our Patented Ladder Restraint System

Helps secure the ladder from theft and shifting during vehicle operation.

C. Slide Rails for guidance

These parallel rails are designed for easily sliding the ladder up the racks

D. Rear Roller Assembly helps loading and unloading

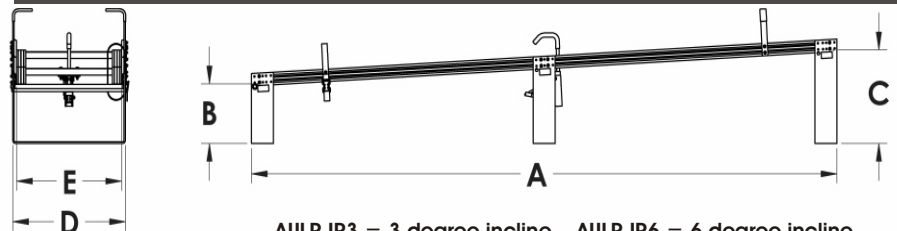

Takes the work out of loading and unloading, the rollers do all the work for you.

E. Easy Assembly & Installation

Assembles in minutes using hand tools. The installation is easy requiring only a few bolts into the top of the service body.

Keeping it simple... Designed perfectly to store extension ladders on a utility/service body, quickly and efficiently. Comes with all the important accessories like our Bottom Mount Ladder Restraint System and rear roller. Simply roll the ladder up onto the rack, lock it down and your off to the next jobsite. How much easier could it get?
